

CAPABILITY STATEMENT

J Mullins Plumbing is family owned and operated business based in Miles with over 30 years experience in the plumbing industry. We offer our extensive customer base the assurance of quality plumbing works, completed by licensed and extensively trained tradesmen and staff. We undertake our tasks in a timely manner, observing all safety and legislative requirements. No job is too big or small and we have staff available for emergencies 7 days a week, 24 hours a day.

Our company offers an extensive range of plumbing, drainage and gas fitting services in the mining, industrial, commercial and domestic sectors of the Miles region and surrounding areas.

We have had a ten year relationship within the mining industry and have an extensive and impressive list of achievements during this time. Our staff have obtained vast knowledge and experience in many areas within the mining industry.

J Mullins Plumbing is continually in a growth phase, particularly given the present opportunities offered in the local area with the extensive gas and coal exploration and distribution activities being undertaken in the Surat Basin. We are constantly looking to improve and expand our business and adapt accordingly as opportunities are identified.
